

Sunshine Coast Innovations Day

Showcasing innovative business solutions

This document features Sunshine Coast innovative business solutions with a new product, service or digital solution that would enhance operational performance/improvements for larger businesses, institutions and corporations.

Each company completed an expression of interest process, and was shortlisted to showcase their solution and business at the 2019 and 2021 Sunshine Coast Innovations Day.

DIGITAL INNOVATIONS

Every organisation must now consider itself a technology business to remain competitive in today's digital age. Businesses can grow revenue, cut costs and even build additional revenue streams with new digital capabilities by leveraging opportunities to develop digital products, and using predictive data and analytics to better understand customer behaviour and internal performance. The following Sunshine Coast businesses provide digital innovations to increase business efficiencies.

Aussie Time Clocks

Cloud-based employee time tracking and leave management platform for live timesheets with payroll, accounting, and HR integration.

Aussie Time Clocks' employer dashboard provides live data on employee attendance, hours worked, leave requests, and clock-in/out time. It also includes bonuses, pay rises, and accruals that can be calculated and implemented automatically in Aussie Time Sheets WorkforceTNA. The mobile app allows employees to request leave, bonus updates, accruals, and pay rises. Multiple time-clock device integrations allow employees to clock-in using face recognition, fingerprints, or card proximity.

Ainsley Coomber

INNOVATIVE PRODUCTS AND SERVICES

Innovative goods and services can be an important tool for organisations to improve their effectiveness and efficiency to customers, address internal challenges and needs, while providing a boost to the bottom line. The following Sunshine Coast businesses provide product and service innovations to increase business efficiencies.

AlgaEnviro

AlgaEnviro provides a natural method to keep your water healthy and control existing algae that cause toxic blooms, floating scum, bad odours and fish kills.

Keeping your water clean and healthy is important if you have farm dams, aquaculture ponds, golf course and garden ponds and lakes, or if you have to treat wastewater. Without the right tools and management, unwanted and toxic algae can take over and make the water ugly, foul smelling and unusable. AlgaEnviro's non-toxic products and systems keep your water healthy with Diatomix, which naturally promotes healthy ecosystems.

ENOPTTE

ENOPTTE's smart grid platform optimises the way business and residential sectors consume energy.

ENOPTTE was formed in 2014 with a vision to optimise solar, battery and energy management systems into a single package delivering affordable and reliable electricity 24/7. With the launch of the ENOPTTE power station in 2019, the vision has been reached with packages now being offered to tiny house, residential and commercial customers. ENOPTTE power stations can also be networked into micro-grids and virtual power stations, simplifying the way energy is stored and distributed, without relying on fossil fuels.

Sunshine Coast Maker Space

Allows locals to capitalise on physical opportunities in the digital economy by outsourcing R&D and product development space locally.

Founder Dominic Vrolijk has been working in the R&D and product development space for 15 years. He started the Maker Space out of frustration trying to get suppliers to work on his R&D projects. Dominic realised that companies which provide contract machining and fabrication find it difficult to work on R&D projects because they are disconnected from the design process. Integrating the prototype manufacturing into the design process delivers better design solutions.
